

28m³ Roll-on Bin Dimensions

These bins are ideal for bulk and high volume waste, and are transported using a roll-on-roll-off truck.

The bin is built using channel sections and the walls are plated with 3mm thick steel.

The cast iron wheels at the rear of the bin assists with the loading and off-loading of the bin as well as positioning the bin in areas or sites which have low headroom.

The door is fitted with a locking mechanism. These bins can be manufactured to clients' specifications in both size and material to be used.
